

THE MODERN TIME COLLECTION

These attractively styled clocks are designed to complement the architecture of modern offices, churches, banks, reception areas and a wide array of other interiors. These classic styles may be substituted for the standard clock dials on National Time's Regular 2-wire, Self Regulating, Dual Motor, Minute Impulse, and Quartz Battery clocks. The 24 Hour dial is only available with 120V 2-wire movement. Standard clocks have 12" white dials with black markers and hands and are available in surface or flush mounting cases finished satin aluminum, white, grey, or flat black. Clocks may be operated from an Electromatic self regulating or dual motor clock system.

• Consult Factory for other dial sizes or custom style
