

**A900-PRINTER**

**A900-COLOR GRAPHIC**

The NATIONAL TIME 900 Series Color Graphic Display and System Printer provides convenient electronic copy and hard copy of the system status. The Color Graphic Display is an IBM PC that connects to the 900/902 Series Fire Alarm Control Panels via the RS232 port on the Fire Alarm Control Panel. The A900-COLOR GRAPHIC operates with or without the System Printer connected. The System Printer is an IBM compatible serial printer which provides a hard copy of the system status via the parallel port on the A900-COLOR GRAPHIC display unit. The A900-COLOR GRAPHIC display unit is capable of distances in excess of the 50 foot RS232 limit with the use of a RS232 to RS422 converter, or a RS232 to Fiber Optics converter or telephone modems.

## **FEATURES**
